

Solving Autism™ is proud to announce the launch of our

EARLY LITERACY AND SCHOOL READINESS PROGRAM

Recommended for ages 3-7 with Autism and Intellectual Disabilities
including not limited to: Down Syndrome, Cerebral Palsy, etc.

The 12-week comprehensive program includes group instruction and one-on-one support consisting of three research-based curriculums:

The Preschool Life Skills (PLS)

PLS consists of thirteen skills taught in sequence. These skills are critical to early school success and cover: instruction following, functional communication, friendship, and tolerance.

Handwriting Without Tears (HWT)

HWT was founded on research-based principles of early childhood development, including how children learn best. It teaches handwriting skills using developmentally appropriate practice and multi-sensory approaches.

McGraw Hill Reading Mastery

This program uses the highly explicit, systematic approach of Direct Instruction to accelerate reading and help students achieve a high rate of success.
